

Attaching Feet To Double-Sided MG Magazine Rack

1) Begin by placing two magazine racks back-to-back and aligning the holes on the feet with the holes on the bottom of the magazine rack sides. It's suggested to lay the unit on the floor when attaching the feet.

2) Using a screwdriver, press down firmly on the head of the screw and turn the screw clockwise up into the holes on the bottom of the magazine rack side. Tighten the screws until the feet are securely attached.
