

Complete set

1. The floor stand main body

2. The clear PC cover plate

3. Aluminum sloping edge

4. Printed sheet

5. The corner connector

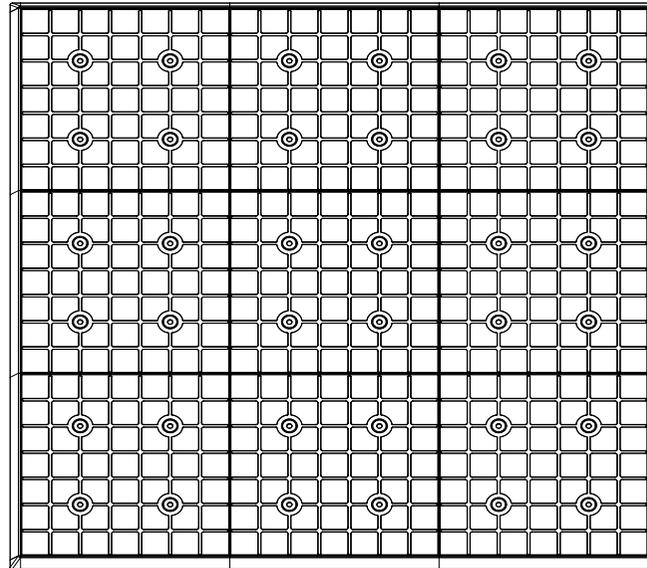

6. The two-pin connector

7. The four-pin connector

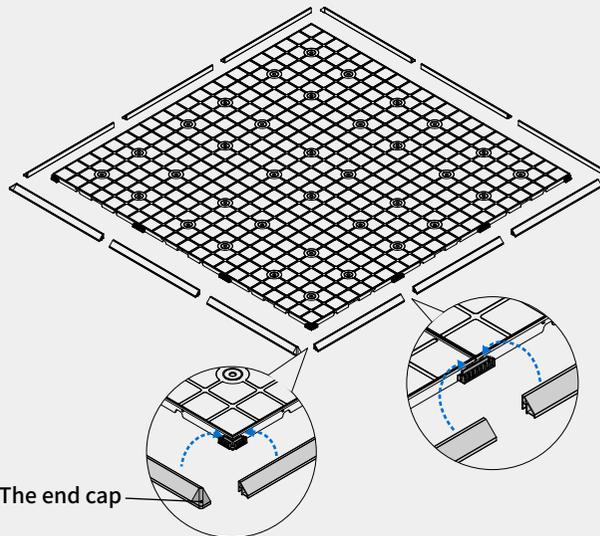

8. Sucker

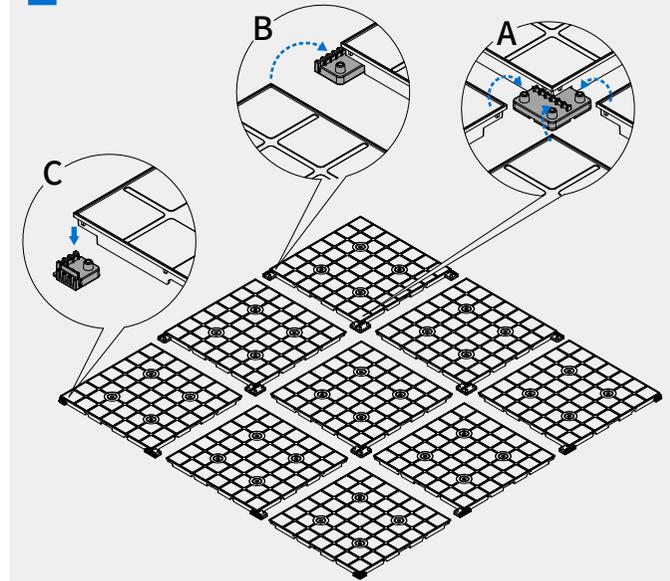

(The following are 9 stage plates as an example.)

2

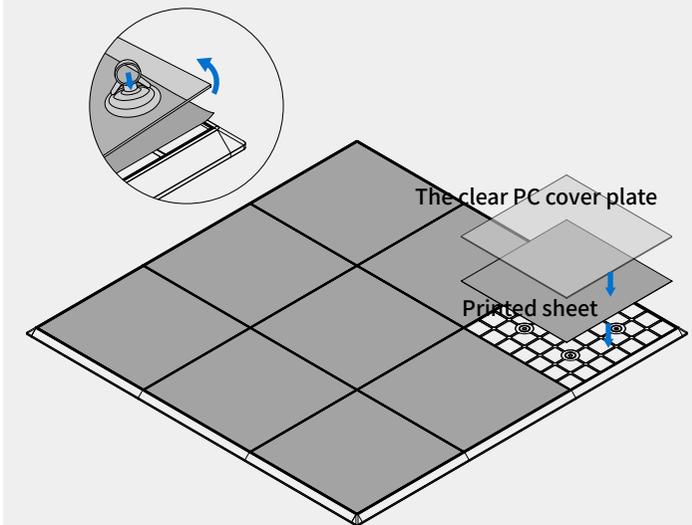

2. Place the aluminum edge strip in the slot of the connecting piece.
(The function of the end cap is to fill the gap of the outer corner of the stage.)

1

1. Put the different connectors under the stage platform.

3

3. First place the printing, then cover the PC board. Finished.
(Tips: Press the sucker on the clear PC cover plate and take it easily, and the printed sheet can be changed conveniently.)
